

## **3th International Conference on Degrowth for Ecological Sustainability and Social Equity**

**Venice (Italy), 19<sup>th</sup>-23<sup>rd</sup> September 2012**

### **THE GREAT TRANSITION Degrowth as a passage of civilization**

#### **GENERAL PROGRAM**

*Degrowth is today not only an invitation to abandon the obsession with growth and the collective imagination based on unlimited growth, but also the most comprehensive effort to deal with the major phase of discontinuity our civilization is facing. Issues as climate change and ecological crisis, the struggle for social and environmental justice, the looting of resources, peak oil and energy crisis, all accompanied by the growing dependence on technology and a huge crisis of social ties remind us the vastness of the challenge that awaits us. We are asked nothing less than to begin a journey of conversion and transformation of material and cultural foundations of the so-called "developed" societies.*

*This path involves the re-signification of the very idea of welfare or well-living, the reconstruction on a basis of justice and interdependence of the "north-south" relationship and the redefinition of a pact of solidarity between generations. A change putting on our agenda topics and issues apparently very different - work, income, consumption, waste, energy, technology, mobility, education, citizenship - but actually inextricably linked.*

*A project of degrowth exempt from all reductionism, economic ecological or political, can be proposed only through comparison and discussion that pay attention to connections, interactions, transversal linking, with a strong cross-disciplinary look capable of holding together natural and social sciences.*

*We will also pay particular attention to the different dimensions tied to the participation to the Conference and to conviviality, from travel arrangements to the sharing of food, from the time together to all forms of exchange.*
